

Abstract

The present invention relates to a compound of formula I

wherein

R_1 is a heterocyclic radical or an unsubstituted or substituted aromatic radical;

G is C_1 - C_7 -alkylene, $-C(=O)-$, or C_1 - C_6 -alkylene- $C(=O)-$ wherein the carbonyl group is attached to the piperazine moiety;

Q is $-NH-$ or $-O-$, with the proviso that Q is $-O-$ if G is $-C(=O)-$ or C_1 - C_6 -alkylene- $C(=O)-$; and

X is either not present or C_1 - C_7 -alkylene, with the proviso that a heterocyclic radical R_1 is bonded via a ring carbon atom if X is not present;

or a salt thereof, which is useful for treating anti-proliferative diseases.
